### **BIKE SHOP SAFETY PRACTICES - updated 6/9/20**

At this time, Bike Clark County Bike Shop is CLOSED to the public- No entry into our facilities is allowed by members of the public. This includes access to our community workbenches and all used parts.

We apologized for the inconvenience and will make a determination to open our shop as soon as possible!

Repair service(s) are offered by walkup to our roll-up door.

We will follow these steps for safety precautions:

- 1.) Customers will drop their bicycles outside the shop for our employees to collect.
- 2.) Bikes might be in a multi-day quarantine prior to working on them. Mechanics will assess the best service for the bicycle and call the customer to confirm service needed.
- 3.) Once repairs are completed the bikes will be disinfected again, customers will be called to arrange pick up.
- 4.) Mechanics will use gloves at all times while working on bicycles
- 5.) Physical Distancing *must* be used in the workplace of at least 6 feet at all times. If, 6 feet social distance cannot be maintain while in the shop or helping customers, a mask is required. This can be a bandana, scarf, neckgator, etc...
- 6.) If kitchen/employee area is used, all surfaces wiped down with bleach mixture after every use.
- 7.) Clean AND disinfect frequently touched objects and surfaces such as workstations, keyboards, telephones, handrails, phones and doorknobs. Dirty surfaces should be cleaned with soap and water prior to disinfection.
- 8.) Avoid using other employees' other work tools and equipment, when possible. If necessary, clean and disinfect them before and after use.
- 9) Social distancing shall be enforced on sidewalk by having customers stand on "dots". BCC will designate one employee to help customers, one at a time, so as to maintain social distance. This will also help mechanics work more efficiently through the current backlog. A mask is to be worn if 6 feet distance cannot be maintained.
